

United States Government

Department of Energy

memorandum

DATE: September 22, 1999

REPLY TO: EH-64
ATTN OF:

SUBJECT: MARSHALL ISLANDS PROJECT RESEARCH

TO: Frank Hawkins, Director
Office of International Health Programs, EH-63

In FY 1999, the Office of Records, Research, Data, and Access committed to researching the following records collections for documents pertinent to nuclear weapons testing in the Marshall Islands and the exposure of the Marshallese to radioactive fallout: BER Radiation Exposure (Special Case Files), Collection No. 326-78-3; 1974-75 AEC Secretary's Files, Collection No. 9; 1961-75 AEC Meeting Minutes, Collection No. 10; Tommy McCraw Files (Classified Portion), Collection No. 1320; Lewis Strauss Collection, Collection No. 1349; Lewis Strauss Working Files, Collection No. 1103; Gordon Dunning Materials, Collection No. 1339; Conrad-Ogle Materials, Collection No. 1387; and Joint Committee on Atomic Energy Hearings, collection No. 1172.

The Office of Records, Research, Data, and Access has now completed research in all these collections. Pertinent documents which were located in them are either being provided to the Coordination and Information Center for transmittal to the Marshallese or have been placed under declassification review.

This fulfills the FY 1999 research commitment to your program made by the Office of Records, Research, Data, and Access.

Roger M. Anders
Office of Records, Research, Data, and Access
